1.1 Project Description

1.1.1 Project Scope

This thesis presents the **MySuperProject**.

This is an example of a footnote [2]. You can see here a reference to Section 1.1.2.

Here we have defined the CS abbreviation. and the UPB abbreviation.

The main scope of this project is to qualify xLuna for use in critical systems.

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Aenean aliquam lectus vel orci malesuada accumsan. Sed lacinia egestas tortor, eget tristiqu dolor congue sit amet. 1.1.2 Project Objectives

We have now included Figure 1.1.

We are now discussing the **Ultimate answer to all knowledge**. This line is particularly important it also adds an index entry for *Ultimate answer to all knowledge*.

1.1.4 Demo listings

We can also include listings like the following:

```
CSRCS = app.c
SRC_DIR =..
include $(SRC_DIR)/config/application.cfg
```

Listing 1.1: Application Makefile

Listings can also be referenced. References don't have to include chapter/table/figure numbers... so we can have hyperlinks like this.

1.1.5 Tables

We can also have tables... like Table 1.1.

Table 1.1: Generated reports - associated Makefile targets and scripts

Generated report	Makefile target	Script
Full Test Specification	full_spec	generate_all_spec.py
Test Report	test_report	generate_report.py
Requirements Coverage	requirements_coverage	generate_requirements_coverage.py
API Coverage	api_coverage	generate_api_coverage.py
